Math in Focus™

The Singapore Approach

Kindergarten consists of:

- Big Book in 2 parts
- Student Book in 4 parts
- Teacher's Edition in 2 parts
- Other supporting components and teacher resources

In Kindergarten, the direct correlation of the Big Book to the Student Book allows for age-appropriate and mathematically sound practice, assessment, and development of problem-solving and thinking skills.

Math in Focus™: The Singapore Approach is the world-class math curriculum from Singapore adapted for U.S. classrooms based on updated math standards. Based on their successful program for grades 1–5, publisher Marshall Cavendish has created an all-new Kindergarten Math in Focus program for U.S. schools. Teacher's Edition pages strategically structure Kindergarten lessons in an **I**nvestigate–**D**iscover–**E**xplore–**A**pply format.

- **INVESTIGATE** — invites children to sing, clap, rhyme, and discuss colorful, playful scenes presented in the Big Book while the teacher systematically elicits related math talk
- **DISCOVER** — provides hands-on work in small groups or pairs to allow children to act out or engage actively with the new math idea
- **EXPLORE** — reinforces and enhances concepts as children go one step further with the concept
- **APPLY** — provides children the opportunity to work independently with paper and pencil to practice the new concept or skill
